AGAVE

Born from one of the world's most remarkable plants, agave spirits carry centuries of tradition, culture, and craftsmanship in every drop. From the red soils of Jalisco to the desert valleys of Oaxaca and the wild northern highlands, these spirits are inseparable from the land and the people who shape them. Each agave takes years - sometimes decades - to reach maturity, storing sugars and character that reveal themselves only once distilled.

Tequila, Mezcal, Raicilla, Bacanora, and Sotol (a close cousin made from desert spoon) each express a unique intersection of plant, place, and method. Some are smoky and earthy, others bright and floral, others yet lean and herbaceous. Together, they embody a patience and sense of terroir rarely found in the world of spirits.

This menu is our invitation to explore that diversity - to sip your way through the landscapes, traditions, and wild beauty of agave.

MEZCAL

Artesanal Method = ● Ancestral Method = △

Mezcal refers to any agave-based spirit and, in its broadest sense, can be produced anywhere in Mexico. However, only certain states recognized by the Consejo Regulador del Mezcal (CRM) are legally permitted to label their spirits as “Mezcal.” Within these designated regions, any agave species that grows may be used - opening the door to a staggering range of expressions.

With over 20 distinct agave varieties commonly harvested (and even more when you count the wild, regional species), mezcal offers an incredible spectrum of flavor and style. Much like wine, its character is shaped by terroir - soil, altitude, climate - and by the artistry of the mezcalero. The traditional underground roasting of agave hearts before fermentation often imparts smoky, earthy, and woody depth, but it is the species of agave itself that provides the true fingerprint of each mezcal, from the citrusy lift of Espadín to the bold, savory punch of Tobalá or the mineral-driven intensity of Tepeztate.

In short: Mezcal is less a single spirit and more a vast landscape - each bottle a snapshot of plant, place, and producer.

Regional Varieties & Variations

TEQUILA

Tequila, named after its birthplace in the Jalisco valley, is a regional spirit crafted from a single agave varietal: *A. tequilana* Weber, blue variety - better known as blue agave. Protected by a Denomination of Origin, Tequila's production is tightly regulated to preserve its heritage and quality. It comes in two distinct styles: **El Valle**, cultivated at lower elevations (800–1200m) in darker, mineral-rich soils, and **Los Altos**, grown at higher altitudes (1800–2200m), celebrated for their vibrant fruit and floral aromatics.

Tequila production is not limited to the town itself - its DO covers five Mexican states. **Jalisco** is the heartland and home to the town of Tequila, as well as both the valley and highland styles. **Nayarit** contributes coastal influence with bold, rustic profiles, while **Michoacán** lends grassy, peppery nuances shaped by its volcanic soils. In **Tamaulipas**, agave grows near the Gulf, producing tequilas with mineral-driven salinity and subtle tropical notes. **Guanajuato**, with its semi-arid climate, delivers tequilas that lean towards spice and rich herbal character.

Together, these regions represent the full spectrum of tequila's diversity, showing how terroir - altitude, soil, and climate - translates directly into the glass.

RAICILLA

Once an outlaw spirit, Raicilla has only recently been granted legal recognition. Produced primarily in Jalisco and Nayarit, raicilla showcases the same artisanal methods as mezcal, but often with a brighter, more aromatic profile. Traditionally made from *Agave maximiliana*, *inæquidens*, and others native to the Sierra Madre Occidental, raicilla tends to highlight herbal, fruity, and floral notes with a lively freshness. It's a spirit that feels both rustic and refined, a hidden cousin of tequila and Mezcal now stepping into the spotlight.

BACANORA

Hailing from the rugged hills of Sonora, Bacanora was once distilled in secrecy for over 70 years during prohibition in the region. Made exclusively from *Agave angustifolia* (the same species as Espadín Mezcal), bacanora embodies the desert - dry, mineral, with hints of smoke, spice, and wild herbs shaped by its arid terroir. Its long history of resilience, survival, and eventual recognition gives it a character as bold as the land and people who protect it.

SOTOL

Though often grouped with agave spirits, sotol is technically in a category of its own. Distilled from the desert spoon plant (*Dasyliirion wheeleri*), sotol thrives in the northern states of Chihuahua, Durango, and Coahuila. Its flavor reflects its desert origins: grassy, earthy, peppery, and sometimes reminiscent of eucalyptus or pine. Traditionally crafted using methods similar to Mezcal, sotol captures the stark beauty of Mexico's northern landscapes - lean, wild, and deeply expressive.

Artesanal Method = ● Ancestral Method = △

Floral & Aromatic - High-altitude growing conditions and coastal breezes can lend notes of rose, blossom, citrus peel, salt spray & coconut.

Don Julio 1942, Blue Weber Tequila, Jalisco	45
